V.K.R., V.N.B. & A.G.K. COLLEGE OF ENGINEERING, Gudivada, organized certificate Program on “GOOGLE SKETCH UP FOR 3D MODELING” for B.Tech students by the resource Person **Mr.K.JEEVAN KUMAR**. 3D modelling is the process of creating three-dimensional representations of an object or a surface. 3D models are made within computer-based 3D modelling software, which we'll explore a little later. During the 3D modelling process, you can determine an object's size, shape, and texture. Totally 100 students were participated in this training program and their completion of the program they were able to understand the following objectives and learning outcomes.

Objectives:

- Wide breadth of experience in model and texture development
- Excellent knowledge of gaming trends and fields
- Superior facility with a variety of pipelines and tools
- Outstanding proficiencies in concept drawing, VFX, basic modeling, and traditional art mythology
- Strong adaptability to new trends and software
- Great skills in coordinating with 3D artistic teams for projects as required

Learning Outcomes:

- Think and solve problems in the 3D space.
- Understand the coordinate system in 2D and 3D.
- Use coordinates, points, vectors, and angles.
- Calculate the sizes and distances of objects.
- Define 2D and 3D shapes, and understand their properties.
- Create 3D objects by extruding planar objects to 3D.

The course is very useful to the students and their feedback is positive. The management and Dr. G. Vijay Kumar Garu, Principal of V.K.R., V.N.B. & A.G.K. COLLEGE OF ENGINEERING thanked the Resource Person and Participants for making the program successful.

A Two-week Add-on program on “HFSS” is organized by Department of Electronics & Communications in ECE seminar Hall. A total of 60 students from 4th year attended the program. This program was aimed to gain the knowledge about designing of various antennas and also the parameters that influence the working of an antenna by designing the antenna. By this designing we can know the radiation of antenna which is not harmful in real world

Objectives:

- To know the basics of HFSS.
- To acquire the knowledge on types of substrates and patches..
- To analyze the designing of antennas.
- To study the different parameters of antennas
- To study the applications of antennas in various fields.

Topics covered:

- Introduction to ANSYS HFSS
- Getting started with ANSYS HFSS
- Calculating the various parameters
- Creating the Microstrip GROUND
- Creating the Microstrip SUBSTRATE
- Creating the Microstrip TRACE
- Creating the Microstrip PATCH

- Creating the EXITATION
- Creating the Air Box
- How to add solution setup to the design
- How to validate and analyze the design
- Study of various parameters in the result
- Study of field responses in the result

Outcomes:

- To understand the basics of HFSS
- To design various parameters required for the antenna
- To understand the creation of various building blocks for antenna.
- To understand the process for solution setup, validation and analyzing the design.
- To understand the various parameters and responses in the result

In this the Resource person explains the necessity of HFSS (High Frequency Simulation Software)

V.K.R, V.N.B & A.G.K College of Engineering, Gudivada established in the year 2008 is one of the best-known self-financing co-educational institutions aiming to achieve excellence in Engineering Education. It is governed by the General & Technical Educational Society (GATES) to uplift aspiring students with a good academic background. The Department of EEE established in the year 2008 offers a full-time four years B.Tech degree program in Electrical and Electronics Engineering.

The last few decades have seen extensive efforts all over the world to develop technologies that can generate clean electricity using renewable energy sources such as wind, solar PV, fuel cells, etc. Unfortunately, renewable energy is hardly available in a form that can be directly used by electrical loads. Hence, almost always some power conditioning is required to get the energy in the desired form. This is where ‘power electronics’ plays a very significant role. A big component of research on renewable energy worldwide goes into studying and developing efficient, reliable, and low-cost power electronic interfaces to couple the loads to the energy source. the two-week program on advances in power and energy is important as it enhances knowledge, develops professional skills, promotes practical applications, fosters networking, addresses energy challenges, encourages adaptability and innovation, and provides a global perspective.

Objectives:

- To create awareness among the students about the different types of non-conventional energy resources
- To Understand the Basic concepts Wind Energy technology
- To understand the Grid Integration Issues
- To understand the design of Micro-grid systems

Learning Outcomes:

- Able to understand the renewable energy sources available at present.
- Able to understand the solar energy operation and its characteristics.
- To educate the wind energy operation and its types
- To educate the tidal and geothermal energy principles and its operation
