V.K.R, V.N.B & A.G.K College of Engineering, Gudivada established in the year 2008 is one of the best known self-financing co-educational institutions aiming to achieve excellence in Engineering Education. It is governed by General & Technical Educational Society (GATES) to uplift aspiring students with a good academic background. The Department of EEE established in the year 2008 offers a full time four years B.Tech degree program in Electrical and Electronics Engineering.

The two-week certificate course on PLC and SCADA aims to provide students with the skills and knowledge necessary to design and implement various arrangements in industrial automation systems. One of the key aspects of PLC and SCADA systems is their ability to control machine operations. The programs that govern these operations are typically stored in battery-backup or non-volatile memory, ensuring that they are not lost in the event of a power failure or system restart. By completing this two-week course, students can develop a valuable skill set that encompasses the design and implementation of robust and reliable industrial automation systems.

Objectives:

- To Control the electro mechanical process
- Understand the use of relays to control the manufacturing process.
- To make the students industrial ready.

Venue: ROOM NO: 318, Computer Lab, VVG.V.

V.K.R., V.N.B & A.G.K COLLEGE OF ENGINEERING, GUDIVADA, organized a certificate program on “ETABS” for II & IV Civil Engineering students by the resource person Ms. P.Anusha, Trainee-Learnnet Skills Ltd. Involves ongoing monitoring of available Technologies to ensure their safety for use, especially since previously undetected events can occur at any time and career opportunities. Totally 77 students were participated in this training program and after the completion of the program they were able to understand the following objectives and learning outcomes

Objectives:

1. Understanding of the fundamental concepts and principles of ETABS software
2. Ability to create and analyze structural models using ETABS
3. Knowledge of how to perform linear and non-linear static and dynamic analysis
4. Knowledge of how to generate construction documents and reports using ETABS
5. Improved efficiency and productivity in performing structural analysis and design tasks

6. obtain comprehensive knowledge on the ETABS software and its applications

Learning Outcomes:

1. **Modeling:** How to create models in less time and interpret the results while working with the physical member based objects.
2. **Concrete Frame Design & Detailing:** Applicable to line objects and the program determines the appropriate design procedure when the analysis is run.
3. **Steel Frame Design & Detailing:** How to detail steel member selection, drift optimization and stress checking processes using various design code algorithms.
4. **Steel Connection Design:** Design of steel connections is seamlessly integrated into the program.
5. **Composite Beam:** To composite beams for determining their sizes for analysis, auto select-section property can be defined.
6. **Dynamic Analysis:** Various options from response spectrum analysis to large deformation nonlinear time analysis.

- Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained and translate solutions into directives for action.
- Conduct and interpret post-optimal and sensitivity analysis and explain the primal-dual relationship.
- Develop mathematical skills to analyse and solve integer programming and network models arising from a wide range of applications.
- Effectively communicate ideas, explain procedures and interpret results and solutions in written and electronic forms to different audiences.

Learning Outcomes:

- An ability to apply the knowledge of mathematics, basic sciences and engineering concepts to solve the complex engineering problems.
- The ability to conduct experiments and to critically analyze and interpret the experimental data to reach at substantial outcomes.
- An ability to design systems, components, or processes to meet appropriate needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- An ability to identify, formulate, and solve the complex engineering problems.
- An ability to function on multi-disciplinary teams that leads the multi-disciplinary projects. Formulate Network models for service and manufacturing systems, and apply operations research techniques and algorithms to solve these Network problems.

The course is very useful to the students and their feedback is positive. The management and Dr. G. Vijay Kumar Garu, Principal of V.K.R., V.N.B. & A.G.K. COLLEGE OF ENGINEERING thanked the Resource Person and Participants for making the program successful.
