Title of the Event:	Awareness Program on Sanitary and Greenary
Event Start Date:	03/06/2023
Event End Date:	03/06/2023
Description:	Most of the rural population of India depends on natural resources for their subsistence and livelihoods. At the national as well as global levels, there is increasing focus on environmental issues and sustainable development across various economic and social sectors. The greening development can stimulate rural economies. Emphasizing on the importance of sanitation, Mahatma Gandhi once said that sanitation is more important than independence. He had a dream of total sanitation for all. With this inspiration our volunteers have actively participated in the program and explained about the significance of sanitation and greenery to the people in the Angaluru Village.

Program Report

NSS Unit Code:	90214608
Title of the Event:	VIOLENCE AGAINST WOMEN
Event Start Date:	05/08/2023
Event End Date:	05/08/2023
Description:	<p>One in three women worldwide experience physical or sexual violence, mostly by an intimate partner. Violence against women and girls is a human rights violation, and the immediate and long-term physical, sexual, and mental consequences for women and girls can be devastating, including death.</p> <p>Violence negatively affects women's general well-being and prevents women from fully participating in society. It impacts their families, their community, and the country at large. It has tremendous costs, from greater strains on health care to legal expenses and losses in productivity.</p> <p>At least 155 countries have passed laws on domestic violence, and 140 have legislation on sexual harassment in the workplace (World Bank 2020). But challenges remain in enforcing these laws, limiting women and girls' access to safety and justice. Not enough is done to prevent violence, and when it does occur, it often goes unpunished. Our college has conducted this awareness program in association with Women Welfare Society.</p>

Title of the Event:	New Voter Awareness Program
Event Start Date:	08/08/2023
Event End Date:	08/08/2023
Description:	<p>India is a democratic country. Every citizen has the basic right to vote. He or she has the right to select his leader to whomever they think is capable of leading the nation, solving the problems of common people, bringing about change, etc. Just think once, that if we do not come forward and choose the right leader then the progress and development of the country will be hampered and will also affect the people of the country. It is the leader of the country who decides various basic big projects and several things. If the basic system will not be developed properly it may lead to under construction of roads, electricity connection problems, etc. Hence, we should encourage youth to participate and build a strong network for the coming generation who will make sure to cast their votes without fail. The main theme of this program is to enrollment of voters who are eligible to vote in the village. Our college has conducted this awareness program in association with a Gudivada municipality</p>

Title of the Event:	Orientation program on Health Care.
Event Start Date:	16/11/2023
Event End Date:	16/11/2023
Description:	<p>Whether we are struggling with personal health issues or going through a global pandemic, health information is crucial to modern life. Health information underlies many, if not all, decisions made by both healthcare professionals and patients in the healthcare setting, particularly when it comes to decision-making on treatments.</p> <p>Healthcare decisions don't take place in a vacuum. They result from different factors like individual characteristics, the context of a specific health condition, the availability of knowledge, etc.</p> <p>Therefore, there is great variety in the degree to which people want to <i>know</i> about their health condition, <i>engage</i> with information, and <i>participate</i> in healthcare decision-making processes. This spectrum of behavior can be explained by the notion of health orientation and health information behavior.</p> <p>Dr. Achytha Babu garu has delivered a lot of valuable points on health care to all our faculty and students. This session was very useful and informative too.</p>

Title of the Event:	SVEEP(Systematic Voter Education and Electoral Participation) Program
Event Start Date:	01/12/2023
Event End Date:	01/12/2023
Description:	<p>“No Voter to be left behind” so goes the motto of the Election Commission of India, and we aim at fulfilling this motto through the SVEEP programme with its main components of Information, Motivation and Facilitation. India is a democratic country. Every citizen has the basic right to vote. He or she has the right to select his leader to whomever they think is capable of leading the nation, solving the problems of common people, bringing about change, etc. Just think once, that if we do not come forward and choose the right leader then the progress and development of the country will be hampered and will also affect the people of the country. It is the leader of the country who decides various basic big projects and several things. If the basic system will not be developed properly it may lead to under construction of roads, electricity connection problems, etc. Hence, we should encourage youth to participate and build a strong network for the coming generation who will make sure to cast their votes without fail. The main theme of this program is to enrollment of voters who are eligible to vote in the village. Our college has conducted this awareness program in Angaluru village.</p>

Program Report

NSS Unit Code:	90214608
Title of the Event:	World Health Day
Event Start Date:	08/04/2024
Event End Date:	08/04/2024
Description:	<p>Whether we are struggling with personal health issues or going through a global pandemic, health information is crucial to modern life. Health information underlies many, if not all, decisions made by both healthcare professionals and patients in the healthcare setting, particularly when it comes to decision-making on treatments.</p> <p>Healthcare decisions don't take place in a vacuum. They result from different factors like individual characteristics, the context of a specific health condition, the availability of knowledge, etc.</p> <p>Therefore, there is great variety in the degree to which people want to <i>know</i> about their health condition, <i>engage</i> with information, and <i>participate</i> in healthcare decision-making processes. This spectrum of behavior can be explained by the notion of health orientation and health information behavior.</p> <p>Principal sir has delivered a lot of valuable points on health care to all our faculty and students. This session was very useful and informative too.</p>
